

## **Dementia Research Community**

Originating as Bondi2Berry Incorporated in 2016, the charity rebranded in 2022 to be known as Dementia Research Community.

Our charity's registration number is INC2000651 and ABN is 35 477 927 819.

The Dementia Research Community brings together dedicated people with a common goal – to raise awareness of dementia, and to fundraise to help find a cure. We have raised over \$1.8 million to date to help with research.

Our mission is to increase understanding of, and help find a cure for dementia. We are a charity whose purpose is to advance health and increase awareness of dementia by:

- Organising large scale cycling events that increase awareness of dementia, and help improve community health and well-being.
- Raising money to fund dementia specific research projects and help find a cure for dementia.
- Communicating dementia related information to continue to educate the community about the disease to help fundraising.
- Organising community engagement events and school visits that enable people to talk about their experiences with dementia to assist in raising awareness and fundraising.

Please do not hesitate to contact me if you have any questions.

Kind regards,

Nick Young  
President  
Dementia Research Community
